Dear Valued Customer,

Congratulations on purchasing The Ultimate Suspension.

As you would be aware it is imperative to have your **1,000 kilometre** mandatory safety check to comply with our warranty conditions.

This must be carried out in an Authorised Mechanical Workshop.

This full suspension re-tighten and check gives the customer peace of mind, confirming that the installation of the Ultimate Suspension has been carried out professionally and checked after a short run-in period to confirm everything is working correctly. This includes re-measuring the vehicle heights at each wheel to guard, and tightening all suspension mounting points. Record the kilometres reading.

Front Suspension: "TORSION Bars"

- Check & tighten 2 or 3 bolts on the front
- Check shock mounts
- Check steering damper *if applicable*
- Check brake line is free
- Check sway bar or links
- Check all control arms and alignment

Rear Suspension: "LEAF Springs"

- Front mounting pin for rear spring both sides
- Rear shackle plates x2 nuts each.
- Rear U-Bolts 4 in total. (8x Nuts)
- Top and bottom shock mounts.
- Caution, do not over-tighten.

- ✓ Check vehicle is stopping safely under brakes.
- ✓ Check vehicle side to side variation, Up to 15mm is acceptable.
- ✓ Check vehicle height front to rear. (Rear must sit higher minimum 25mm)
- ✓ Check tyre wear for any irregularities.
- ✓ Check steering wheel on centre.
- ✓ Test drive for any irregularities.
- ✓ Re-Wheel Align if necessary.

Return this Check List signed off and dated as checked.
