RAISED SUSPENSION RIDE HEIGHTS (mm)

< >	OE - After
FRONT	530 - 565
REAR	574 - 610

The raised ride heights (Eye Brow Heights) are measured vertically from the centre of the wheel to the edge of the guard. These heights are provided as approximate measurements only and can vary depending on the age of the vehicle and accessories fitted. Variations from factory will mean not all vehicles will be raised by a set amount. They will however end up near these heights. We recommend measuring the vehicle first for indication on achievable lift.

All raised height measurements are listed as a guide only.

NOTE:

To achieve maximum target heights on MQ Tritons, it is necessary to replace the OE front droop stops with an upgraded Front Upper Shortened Bump Stop.

Standard heights for the MQ Triton: Front - 530mm +/- 20mm; Rear - 574mm +/- 20mm

Target height for the MQ Triton: Front - 565mm +/- 15mm; Rear - 610mm +/- 15mm

Heights are calculated by measuring centre of wheel to guard & centre of wheel to underside of rear tray.

Note: Heights may vary according to individual vehicle.

Note: Vehicles require wheel alignment, headlight and brake proportioning valve adjustment with raised suspension.
