### RAISED SUSPENSION RIDE HEIGHTS (mm)

< >	OE - After
FRONT	509 - 552
REAR	553 - 601

The raised ride heights (Eye Brow Heights) are measured vertically from the centre of the wheel to the edge of the guard. These heights are provided as approximate measurements only and can vary depending on the age of the vehicle and accessories fitted. Variations from factory will mean not all vehicles will be raised by a set amount. They will however end up near these heights. We recommend measuring the vehicle first for indication on achievable lift.

**All raised height measurements are listed as a guide only.**

### CASTOR/CAMBER CORRECTION

With some vehicles, a perfect wheel alignment cannot be achieved with a raised height suspension kit. It may be necessary to install Adjustable Control Arms to correct the alignment. A wheel alignment should be carried out to calculate whether the adjustable control arms are required.
