### RAISED SUSPENSION RIDE HEIGHTS (mm)

< >	OE - After
FRONT	520 - 560
REAR	582 - 620

The raised ride heights (Eye Brow Heights) are measured vertically from the centre of the wheel to the edge of the guard. These heights are provided as approximate measurements only and can vary depending on the age of the vehicle and accessories fitted. Variations from factory will mean not all vehicles will be raised by a set amount. They will however end up near these heights. We recommend measuring the vehicle first for indication on achievable lift.

**All raised height measurements are listed as a guide only.**

### CASTOR/CAMBER CORRECTION

With some vehicles, a perfect wheel alignment cannot be achieved with a raised height suspension kit. It is often necessary to use an adjustable control arm or install eccentric control arm bushes to correct the alignment.

The Ultimate Suspension recommends Replacement Upper Adjustable Control Arms or Super Pro Control Arm bushes.

TRC470	Replacement Upper Adjustable Control Arms	\$1163.80	1	<b>\$1163.80</b>
<b>or</b>				
SPF3230K	Upper Control Arm-Inner Eccentric Bush Kit (Offset tube)	\$352.00	1	<b>\$352.00</b>
