

The Ultimate Lubricant Range

4X4 OFF-ROAD 5W/40 OIL

Premium performance, multigrade, 4 stroke heavy-duty diesel engine oil specifically designed to lubricate a wide range of diesel and gasoline engines requiring API CI-4 PLUS, CI-4, SL, ACEA E7 or JASO DH-1 performance lubricants. Specifically designed for the latest electronically controlled diesel engines, including those fitted with EGR and/or SCR systems. Formulated from premium HYDRO-SYN® base oils to provide exceptional soot dispersancy, deposit control and wear protection for 4WD.

Performance Features

Extends engine life of metal sliding surfaces- High level of anti-wear additive protects against valve train sliding wear and scuffing of highly loaded parts.

Increase profit from maintenance - Exceptional soot dispersancy keeps fuel soot in suspension, avoiding filter plugging, heavy cylinder head sludge, abrasive polishing wear and oil thickening.

Minimises fleet operating costs - Excellent deposit control on valves and piston crown-lands reduces oil consumption. Exceptional oxidation stability and soot control extends oil drain capability so that equipment is in service longer generating revenue. Outstanding valve train wear protection maintains fuel economy.

Applications

Commercial road transport, including the latest electronic controlled engines and those designed to meet Euro 3 emissions standards. Also for Euro 4 and 5 compliant vehicles, except those units fitted with diesel particulate filters and requiring ACEA E6 or E9 oils.

The Ultimate SUSPENSION

HYDRO-SYN®

What makes our products distinct from competitors?

Quality, Value, Experience

The Ultimate Suspension, a leading name in aftermarket 4WD and commercial vehicle suspension, prides itself on being at the forefront of today's suspension technology.

At a time when expansion and innovation is far from commonplace, The Ultimate Suspension is continuing its push forward into international markets, widening its product range and creating stronger Australian presence in the global high-tech community.

The Ultimate Suspension's reputation in the development of suspension systems as a complete package has not only achieved recognition in the aftermarket but valuable alliances with original equipment manufacturers both domestically and abroad. The off road racing circuits including the Australian Safari have been extensively utilised in the development and prerelease evaluation of new models. Ken, through his technical association with companies such as Toyota, Daihatsu, Nissan, Nismo, Isuzu, Mitsubishi, Asia Motors, Proton and Bufori just to name a few, has gained international recognition for specific built suspension systems. The Ultimate Suspension successes, through domestic use and in mining and military applications, have won us many accolades and orders to return income to an Australian based industry.

The Ultimate Lubricant Range has now provided a dependable and reliable oil to meet the existing reputation of The Ultimate Suspension team.

It's in the base stock... The Ultimate Lubricant Range is designed around a HYDRO-SYN® base stock oil. This gives the lubricants dependable qualities such as improved oil pressure, a larger operable temperature range, a greater resistance to oxidation and degradation, and the grit to handle 4WD applications.

The HYDRO-SYN® component of our oils allows us to guarantee maximum performance to customers.
