The Ultimate Lubricant Range

4X4 URBAN 10W/40 OIL

The Ultimate CJ4 Diesel Engine Oil is an API CJ-4 oil for use in high-speed four stroke cycle diesel engines designed to meet the on-highway exhaust low emission standards that are implemented for 2007 model year and forward diesel engines including diesel engines previously requiring API CH-4, CI-4 and CI-4 Plus where Ultra Low Sulfur Diesel (ULSD) fuels are utilised. The Ultimate CJ4 is a Super High Performance Diesel (SHPD) engine oil that will provide superior performance in 4WD application.

CHARACTERISTIC

INTEREST

High shear stable viscosity modifier polymers	Maintains viscosity throughout oil service improving engine protection
Dependable HYDRO-SYN® base oil	Increased soot handling capabilities, longer oil drains
High thermal and oxidation stability	Reduction in sludge build up, deposits and less viscosity increase
Excellent low temperature properties	Complete protection from wear at start-up
High TBN (alkali) reserves	Neutralisation of acidic compounds from fuel blow-by
Advanced detergency/dispersancy additives	Cleaner engines and longer metal component life
Component compatibility	Longer gasket and seal life
Meets specifications set by key OEMs	One engine oil for mixed fleet operators

The Ultimate SUSPENSION

HYDRO-SYN®

What makes our products distinct from competitors?

Quality, Value, Experience

The Ultimate Suspension, a leading name in aftermarket 4WD and commercial vehicle suspension, prides itself on being at the forefront of today's suspension technology.

At a time when expansion and innovation is far from commonplace, The Ultimate Suspension is continuing its push forward into international markets, widening its product range and creating stronger Australian presence in the global high-tech community.

The Ultimate Suspension's reputation in the development of suspension systems as a complete package has not only achieved recognition in the aftermarket but valuable alliances with original equipment manufacturers both domestically and abroad. The off road racing circuits including the Australian Safari have been extensively utilised in the development and prerelease evaluation of new models. Ken, through his technical association with companies such as Toyota, Daihatsu, Nissan, Nismo, Isuzu, Mitsubishi, Asia Motors, Proton and Bufori just to name a few, has gained international recognition for specific built suspension systems. The Ultimate Suspension successes, through domestic use and in mining and military applications, have won us many accolades and orders to return income to an Australian based industry.

The Ultimate Lubricant Range has now provided a dependable and reliable oil to meet the existing reputation of The Ultimate Suspension team.

It's in the base stock... The Ultimate Lubricant Range is designed around a HYDRO-SYN® base stock oil. This gives the lubricants dependable qualities such as improved oil pressure, a larger operable temperature range, a greater resistance to oxidation and degradation, and the grit to handle 4WD applications.

The HYDRO-SYN® component of our oils allows us to guarantee maximum performance to customers.
