

The Ultimate Lubricant Range

75W/90 GEAR OIL

The Ultimate Gear Oil GL5 75W-90 Premium extreme pressure differential gear oil meets the requirements of API GL-5, Designed for use in limited slip (or spin resistant) rear axles, differentials, gear boxes and steering gears requiring a hypoid or extreme pressure lubricant. The Gear Oil GL5 75W-90 is formulated utilising an exclusive blend of high viscosity, shear stable synthetic base oils and high-performance additives delivering;

Performance Features

- ✓ Excellent high temperature stability to withstand extreme operating temperature
- ✓ Excellent low temperature fluidity
- ✓ Fortified using extreme pressure additive technology to provide increased protection by reducing wear between gear teeth during high load and shock loading operating conditions
- ✓ Contains special anti-wear, Extreme Pressure and lubricity additives
- ✓ Controls heat from frictional and load forces

Application

Passenger cars, high performance race cars, light commercials, **4WDs**, light commercial vehicles, SUV and on- and off- highway truck and construction equipment.

Axles, final drives and conventional differentials where API GL-5 is recommended Hypoid gears that experience high load and shock loading where lubricant film strength is crucial, such as in most rear-wheel drive vehicles.

Gears that experience high speed and/or low speed and high torque conditions

Final drives used in heavy trucks, construction and farm equipment that require speed reduction and torque increase for heavy duty application

The Ultimate SUSPENSION

HYDRO-SYN®

What makes our products distinct from competitors?

Quality, Value, Experience

The Ultimate Suspension, a leading name in aftermarket 4WD and commercial vehicle suspension, prides itself on being at the forefront of today's suspension technology.

At a time when expansion and innovation is far from commonplace, The Ultimate Suspension is continuing its push forward into international markets, widening its product range and creating stronger Australian presence in the global high-tech community.

The Ultimate Suspension's reputation in the development of suspension systems as a complete package has not only achieved recognition in the aftermarket but valuable alliances with original equipment manufacturers both domestically and abroad. The off road racing circuits including the Australian Safari have been extensively utilised in the development and prerelease evaluation of new models. Ken, through his technical association with companies such as Toyota, Daihatsu, Nissan, Nismo, Isuzu, Mitsubishi, Asia Motors, Proton and Bufori just to name a few, has gained international recognition for specific built suspension systems. The Ultimate Suspension successes, through domestic use and in mining and military applications, have won us many accolades and orders to return income to an Australian based industry.

The Ultimate Lubricant Range has now provided a dependable and reliable oil to meet the existing reputation of The Ultimate Suspension team.

It's in the base stock... The Ultimate Lubricant Range is designed around a HYDRO-SYN® base stock oil. This gives the lubricants dependable qualities such as improved oil pressure, a larger operable temperature range, a greater resistance to oxidation and degradation, and the grit to handle 4WD applications.

The HYDRO-SYN® component of our oils allows us to guarantee maximum performance to customers.
